My Tools

Javascript

jQuery

HTML

CSS

MongoDB

React

MySQL

Also in my Toolkit

Bootstrap	Express
Materialize	Mongoose
React-Materialize	Sequelize
SASS	Firebase
HandleBars	Python
Knockout.js	Java
jQueryUI	Cheerio
Git	Regex
Selenium	Mario Kart

Languages

English	Vietnamese

Proficient in various silly accents

The Mai

Full-Stack Web Developer

I am a full-stack web developer specializing in the MERN and SERN stack. A hard-work ethic, comprehension, and empathy are qualities I value in my co-workers and I make sure to live up to the same standard. I love learning new things as much as I love teaching them and am not afraid of taking risk if it means growth towards my goals. With that being said, I am currently looking for a new opportunity in the Web Development community and am excited to get better together.

Recent Projects

2018   **MemberDat**

Node, React, Materialize, MongoDB, Mongoose, Heroku
- MemberDat is accounting/membership management software
- Helps users store/edit member and invoice data on MongoDB with RESTful API
- Keeps track of subscriptions/payments with auto generating invoices
- Delivers data to user with a UI that feels responsive with every click

2018   **Pho Now | Content Managent System**

Node, Bootstrap, Handlebars, jQuery, mySQL, Sequelize, Heroku
- Trendy restaurant website on the customer face side using Bootstrap as a base
- Back-end administrative side acts as a Content Management System
- Allows owners to make live changes to restaurant info (Menu, hours, etc..)

2018   **Let's Eat**

Node, Bootstrap, Knockout, jQuery, Firebase, Heroku
- A meet-up app for people who don't want to eat alone and would like to make friends by eating with people with similar taste buds in the area
- Combines Knockout.js and jQuery for result generation.
- The app is integrated with Google Maps API for location lookup.
- Uses Yelp API to find restaurants nearby and deliver info back to user.

Education

**2018-01 -
2018-07**   **The Coding Boot Camp at UT Austin**
- Undertook 24-week intensive programming boot-camp based around modern full-stack web development.
- Practiced solo and group programming techniques using methods like AGILE and version control.
- Plan, analyze, design, implement, test, and deploy projects from the ground up.
- Understand new concepts and technologies to adapt to any tech enviroment.

**2010-08 -
2014-12**   **University of Houston**
- Bachelor's Degree, Hospitality Administration/Management

Relevant work experience

**2014-10 -
2017-06**   **Marco's Pizza**

Houston Area Training Supervisor
- Develop strategic plans and processes to reduce operational expenses
- Prepare and conduct presentations for corporate/regional upper management.
- Lead and educate franchisees/managers to maintain company standards.
- Provide performance evaluations and feedback for franchisees based on benchmarks.
